One interesting point Trish, is that nowhere that I reviewed in these documents show who collected the samples, or under what conditions, or in what containers. Proper collection and handling are kind of important to the results. Although none of the results in these reports (water anyway) look anything like a smoking gun.

I collected a creek sample on May 26, 2011 and provided the Schilke's with a duplicate of that sample, which was sealed with packaging tape and I signed my name across each bottle and the tape. It does not appear that this sample is included in the reports, as all samples of water and soil are listed as collected on June 8, 2011.

Good luck with this.

Jim and Kris,

I know that both of you have worked on Jacki Schilke's environmental concerns. I am emailing to let you know that I have forwarded Jacki Schilke's data to ATSDR today. I think you have already received it, but just in case I have attached the data below. This is the data that Jacki hired a contract to collect and have analyzed.

Thanks,
Tricia
